

CLEANING FOR COVID-19

COVID-19 (novel coronavirus 2019) is a respiratory illness that primarily spreads through the air and through personal contact with surfaces and infected people. COVID-19 is an enveloped virus, meaning it is easily compromised by proper cleaning and sanitizing. It is unknown how long COVID-19 can survive on surfaces, but it is recommended to clean and sanitize high contact surfaces at home, school, and the work place.

Remove visible soil and dirt from surfaces using soap and water.

Apply an EPA registered disinfectant to kill pathogens, including COVID-19. Common cleaners include:

- Clorox Disinfecting Wipes
- Lysol Brand Bleach Multi-Purpose Cleaner
- Purell Multi Surface Disinfectant

For effective sanitizing, wait the proper contact time as indicated on the product label.
